19” Data Rack Accessories

IP-BS620

STEEL | BATTERY SLIDE

44.45mmH x 495mmL

IP Enclosures Battery Slides are rack-mounted steel support rail designed to securely support battery installations within the data racks and infrastructure cabinets. The channel-section design provides efficient load transfer to rack uprights, while integrated retaining flanges secure battery positioning. Compatible with standard rack systems and M5 fasteners, the slide enables flexible battery configuration, service access, and airflow management.

Material:
- Body: 2.0mm Galvanised steel sheet.

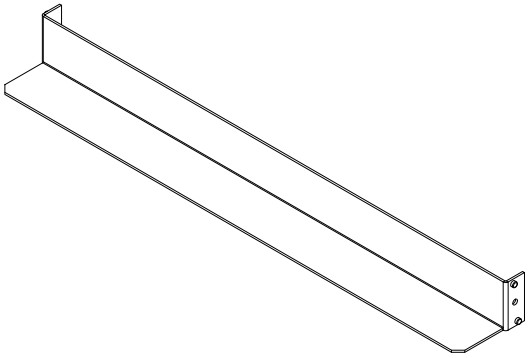

Colour: RAL9005 Jet Black.

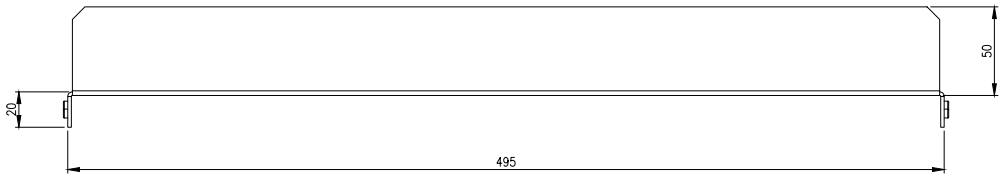

Inclusion: With M5 fasteners.

Quantity: 1x Pair (2x pcs).
