# Electrical Enclosure Accessories IP-SSPMP

## STAINLESS STEEL | U-CHANNEL PROFILES Suited for Electrical Enclosures

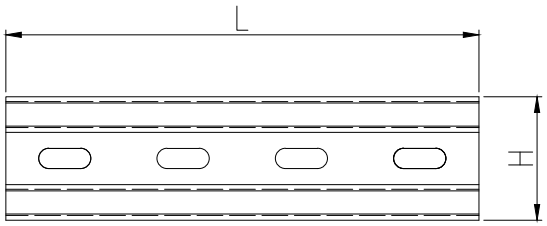

IP Enclosures stainless steel U-Channel Profile Mounting Rails are structural mounting members engineered for pole-mounted electrical enclosure installations. They are designed to interface with pole mounting brackets. The U-profile rail provides high mechanical strength, effective load distribution, and adjustable fixing locations for secure attachment to utility poles and column structures. The reinforced channel section offers excellent resistance to bending and torsional stresses, ensuring long-term stability and reliability in demanding outdoor electrical, telecommunications, and infrastructure installations.

**Material:**
- Body: 2.0mm Grade 316 stainless steel.
